

## ECIO 2020 RECEIVES RECORD NUMBER OF ABSTRACTS

The European Conference on Interventional Oncology has received more than 230 abstracts, a whopping 25% surge from last year. The Scientific Programme Committee is particularly happy to see yet another increase in the quality of submitted work, which will make for another exciting congress. Make sure to secure your spot by January 16 to catch the early fee!

### Your trip to ECIO 2020

When booking your accommodation in Nice, make sure to use Kuoni, CIRSE's official travel partner! Its easy-to-use booking tool provides an excellent overview of available hotel rooms at great rates. In addition, you can save on your flight with this special [travel discount](#).

### Help improve interdisciplinarity in IO

What could be better for increasing the visibility of interventional oncology than letting your tumour board know what IO can do for patients? Take one of your non-radiologist colleagues to ECIO 2020 free of charge with registration and travel expenses covered by the Collaborating Against Cancer Initiative!

### Don't forget to submit your abstract for CIRSE 2020!

Only one more month left to submit your abstract for CIRSE 2020! If you haven't submitted your scientific, educational or case report abstract, make sure to do so by February 17 to become one of the oral or poster presenters!

### Free CIRSE 2020 registration for young IRs

If you are a CIRSE junior member submitting an abstract for CIRSE 2020 as a first or presenting author, make sure to apply for the IR Trainee Support Programme to receive free congress registration! Don't wait too long – there are only 200 spots available.

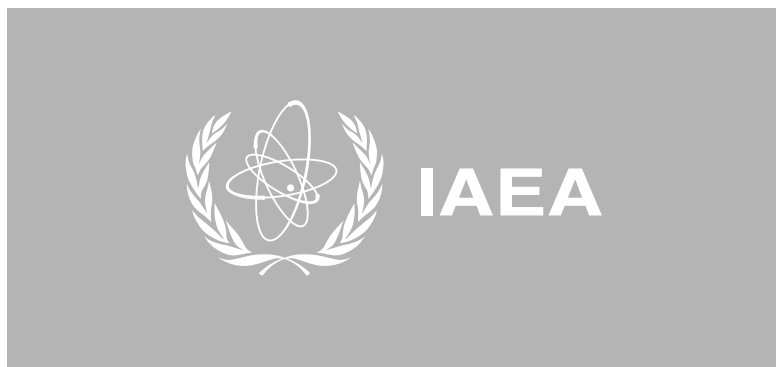

### Register now for ET 2020 to catch the early fee

Can't wait for the embolisation meeting of the year? Not to worry! You can already browse the programme and start putting together your personal itinerary. Register for the congress now and save up to 53% with the early bird fee!

### ICCIR: Last chance to submit your complications case

Only a few more days left to share your interesting complications case with colleagues and gain free registration for the International Conference on Complications in IR in Poertschach, AT June 4-6, so make sure to submit today!

### Radiation protection webinar

With the support of CIRSE and the International Organization for Medical Physics, the International Atomic Energy Agency will host a free webinar on radiation protection in fluoroscopy guided interventions on January 16. Sign up now!

### New SOP on PAVM

CIRSE's latest standards of practice document details the diagnosis of pulmonary arteriovenous malformations and identifies transcatheter embolisation as the preferred therapy. Enjoy free access to the paper for the next six weeks via CVIR online!

### Eight new online courses available now

Start 2020 strong with the CIRSE Academy's new courses! CIRSE now offers a total of 37 fully CME certified online courses covering the entire spectrum of IR. Browse all courses to find the one that is right for you. CIRSE members enjoy highly reduced rates.

### New topic package on DVT management

The CIRSE Library now features a newly released topic package on DVT management compiled by Maria Tsitskari, including lectures from a number of CIRSE congresses, an expert video and further reading on the topic. CIRSE members can access all content free of charge.

### Mark your calendars!

In 2020, the European School of IR will host courses on prostate embolisation, advanced critical limb ischaemia, DEB & cTACE in primary and secondary liver cancer as well as thyroid thermal ablation. Mark your calendars and stay tuned – registration coming soon!

### 15% APC discount

To celebrate CVIR Endovascular's success and make publishing in the journal available to as many researchers as possible, CIRSE now offers a 15% discount on article processing charges to CIRSE members in good standing. Don't miss this great opportunity!
