

Discover the Enrolled and Accredited Centres!

## TAKING INTERVENTIONAL ONCOLOGY TO THE NEXT LEVEL

Currently, ten centres from all over the world are participating in the pilot phase of the International Accreditation System for Interventional Oncology Services (IASIOS). Two of those have now completed the accreditation process successfully and achieved IASIOS Accredited Centre status. Visit the newly revamped IASIOS website for information on what constitutes best practice for an IO service line and how your centre can start preparing for the 2021 public launch!

### Free Content

You don't have to put your IR education on hold! In an effort to support continued education at home, CIRSE has made seven of its Academy courses and access to more than 190 lectures from the past year of congresses available free of charge. Browse now to find what interests you!

### CIRT methodology published in JMIR

The CIRT Steering Committee is proud to present the first publication resulting from a CIRSE sponsored research project: the CIRT methodology paper, published in JMIR Research Protocols. Read it here and learn more about CIRT!

### Start planning your CIRSE 2020 itinerary

The CIRSE 2020 preliminary programme is online, so make sure to browse the extensive programme, including the Interdisciplinary Endovascular Aortic Symposium and PAD day, to put together your personalised itinerary!

### CIRSE 2020: Women in IR

The annual congress will again feature a session dedicated to women in IR, this year focusing on women who have excelled as leaders in the specialty and who demonstrate the importance of female role models for the next generation.

### ICCIR 2020 postponed to Dec. 16-18

Due to the COVID-19 pandemic, the International Conference on Complications in Interventional Radiology has been postponed to Dec. 16-18 and relocated to Vienna. We look forward to another interesting meeting in December!

### Award of Excellence in IR

Have you developed cutting-edge technology, devised a new technique or produced ground-breaking research results? If so, you may be eligible for the CIRSE award honouring such achievements in IR – apply today!

### New COVID-19 articles in CVIR

CVIR is offering free access to its COVID-19 related articles, including a very relevant and interesting article on how to handle COVID-19 patients in the angiosuite. Browse the topical collection to stay up-to-date on all new articles!

### 15% APC discount

To make publishing in CVIR Endovascular available to as many researchers as possible, CIRSE is now offering a 15% discount on article processing charges to CIRSE members in good standing. Don't miss this great opportunity and submit your work today!
