

# ET 2021 June 17-19 ONLINE

MASTERING EMBOLISATION - REACHING NEW HORIZONS

## BE THERE FOR THE NEXT BIG IR EVENT!

The European Conference on Embolotherapy – ET 2021 – is only a month away and there are more topics than ever to explore in this exciting field of interventional radiology! Programme highlights include sessions on established therapies such as PAE, UFE, TARE and TACE, but also on exciting new applications such as low-flow AVMs, joints and haemorrhoids. The various session types will cover every aspect of daily practice from technical tips and tricks to case-based learning and a review of tools and materials.

Browse the [full programme](#) for all sessions and make sure to secure your spot for ET 2021 today!

### Webinar: US-guided thermal ablations of benign thyroid nodules

Despite the steady increase in demand for thyroid thermal ablation of benign thyroid nodules, very few European centres currently provide the treatment. To help physicians educate themselves on this topic, CIRSE and ETA have joined forces and organised the very first webinar focusing on thyroid thermal ablation, which will be held on May 18 from 16:00-18:00 CEST. Participating in the webinar is free of charge.

### Showcase your contribution to IR!

Interventional radiology thrives on its community's innovative spirit. The Award of Excellence and Innovation sponsored by the Rolf W. Günther Foundation for Radiological Sciences in IR aims at recognising the achievements which make the specialty's success story possible. If you or your team have helped develop cutting-edge technology, a new technique or ground-breaking research results, apply by May 14 to be considered for the award which comes with a prize of €6,000.

### Get your knowledge certified

Join the more than 800 interventional radiologists from around the world who have passed the European Board of Interventional Radiology examination and now hold the prestigious EBIR title. The next examination will be held remotely on Oct. 21, enabling more specialists than ever to certify their IR knowledge. Find out more and register today!

### Grant for young residents and fellows

The Rolf W. Günther Foundation for Radiological Sciences will award 10 CIRSE All-Access Passes to young interventionalists wishing to attend CIRSE 2021. Radiology residents and fellows from Europe under the age of 35 who are the presenting author of an accepted paper or poster will be able to apply, once the notifications have been sent out. Refer to our website to stay updated!

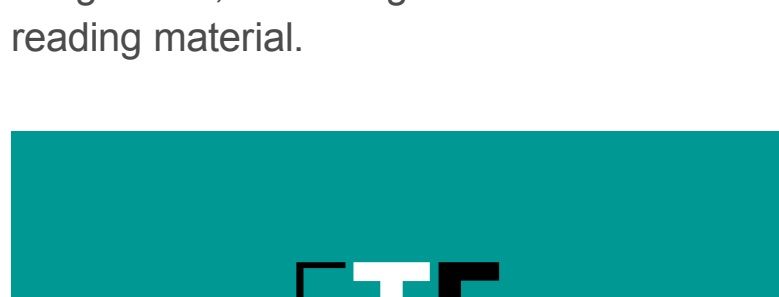

### Topic package: Liver dominant metastatic disease

Prof. Laura Crocetti has put together an extensive CIRSE Library topic package providing and excellent overview of the currently available therapies for liver dominant metastatic disease. The package includes lectures from recent CIRSE congresses, relevant guidelines and further reading material.

### Indexed in ESCI

CVIR Endovascular has been selected for inclusion in the Web of Science. All articles published will be included in the Emerging Sources Citation Index (ESCI), demonstrating the journal's strong dedication to providing the most relevant and influential IR endovascular content to the community.

### ETF survey on international mobility

The European Trainee Forum is calling on all interventional radiology fellows, young IR consultants and radiology trainees with an interest in IR to share their experience with working abroad. The survey is intended to gather information on young interventionalists' motivation to access training outside their home country. The gathered data will hopefully help in the creation of future opportunities.

### Medical students' perspectives on IR

The results of the European Trainee Forum's survey among medical students to determine their level of knowledge about IR are now available via a summary which also details the initiatives the ETF is planning to help increase the awareness of interventional radiology among medical students.

**It's not too late to get your All-Access Pass**

Gain access to all CIRSE congresses, webinars and online education tools in 2021 for one low fee with the new All-Access Pass! Staying up to date on everything IR has never been easier. Or cheaper! The All-Access Pass can now also be purchased through group registration to enable your entire team to learn, share and connect with interventional specialists from around the world throughout the year!

**Literally speaking**

Get to know some of the funnier aspects of the many languages spoken by our members in our new segment, where we take a proverb from somewhere in the world and translate it word for word into English.

Can you guess in which European language “**picking up the pigeons**” will tell you what someone is about to do?

Let us know a funny proverb in your language at [communications@cirse.org](mailto:communications@cirse.org)!

**IR vacancy of the month**

If you are interested in a new challenge within the German speaking area, apply today for the position of head of radiology at the Asklepios Klinik Wandsbek in Hamburg!

To view this vacancy or add an open position from your institution, visit CIRSE's IR vacancy finder.

**Let us know what matters to you!**

If you would like to share interesting news about your institution, research project or interventional radiology in general, let us know at [communications@cirse.org](mailto:communications@cirse.org)!

**Was the content of this newsletter relevant to you?**

Absolutely!       Meh.

Some of it.       Sorry, I had nodded off.

**Literally speaking – Answer**

“**едигам гълъбите**” (“I am picking up the pigeons”) is Bulgarian for saying that you are about to leave.
