

IDEAS AT CIRSE 2022

The Interdisciplinary Endovascular Aortic Symposium, a three-day focus track within the annual congress, will feature no less than 16 sessions and hands-on workshops on everything aortic treatment has to offer. Following IDEAS' spirit of interdisciplinary collaboration, several expert round tables including renowned surgical and IR experts will scrutinise all aspects of aneurysm repair, from guidelines to challenging cases, from new technology to possible future developments. New this year: a hands-on planning course for EVAR, FEVAR, BEVAR, and TEVAR!

Hands-on device trainings at

CIRSE 2022 will offer congress-goers the widest array of hands-on device training sessions to date! In dedicated device trainings on eleven different topics, participants will have the chance to learn about the intricacies of the respective technology with experienced physicians providing valuable tips and tricks. Not to be missed!

Safe sedation & simulation training

In the ever-popular safe sedation workshops, beginners and advanced practitioners will have the opportunity to perform procedural sedation in a simulated environment. Further simulation training will be provided in sessions on mechanical thrombectomy in ischaemic stroke, acute peripheral ischaemia, TACE, and PAE.

Trainees at CIRSE 2022

The European Trainee Forum will host a variety of events at CIRSE 2022 geared towards young interventionists at the beginning of their career, including a series of sessions on topics such as young women in IR, trainees and research, and how to boost your IR career. In addition, the ETF will host a networking event allowing trainees from around the world to create invaluable connections.

CIRSE student programme

Make sure to let your students know about the CIRSE Student Programme, which allows undergraduate students to attend CIRSE 2022 and get to know interventional radiology as a potential career path. Students can enjoy many dedicated activities, such as a mentoring breakfast, a students on stage session, a students' quiz, and more!

Course on TARE for liver tumours

In November, the European School of Interventional Radiology will host a two-day course on radioembolisation of liver tumours in Utrecht/NL. Organised by Dr. Maarten Smits and his team, the course will introduce attendees to the fundamentals of the field as well as the latest evidence and various techniques. The expert faculty will discuss in-depth planning of the procedure, present challenging cases, and provide tips and tricks in extensive workshops. Places are limited, so make sure to secure your spot today!

Self-Assessment in multiple languages!

The International Accreditation System for Interventional Oncology Services (IASIOS) is a membership-based system specifically developed for medical facilities who wish to certify their continuous strive to offer the best possible patient care. IASIOS now offers a self-assessment checklist – a quick way to check your institution's current standing regarding the core requirements to achieve accreditation. The checklist is now available in seven languages to facilitate the application process for hospital administration staff. Find out if your facility is eligible!

CVIR Editors' Medal

We are pleased to announce the winner of the CVIR Editors' Medal 2022: Prof. Mark Little et al. receiving the distinction for their interim analysis of GENESIS; a prospective pilot study investigating the role of genicular artery embolization (GAE) in patients with mild-to-moderate osteoarthritis of the knee using permanent microspheres. Read the article free of charge here!

Hear from our authors

As a community-focused journal, CVIR Endovascular is keen to provide a space to discuss research with IRs worldwide. Its latest interview series features researchers who have recently published a paper in the journal and share their experience of publishing with CVIR Endovascular, disseminating their research open access, and more. Find out what they had to say!

Literally speaking
Get to know some of the funnier aspects of the many languages spoken by our members in our new segment, where we take a proverb from somewhere in the world and translate it word for word into English.

Can you guess in which language someone might tell you that **that they're not smelling themselves in their leather today?**

Let us know a funny proverb in your language at communications@cirse.org!

Let us know what matters to you!
If you would like to share interesting news about your institution, research project or interventional radiology in general, let us know at communications@cirse.org!

Was the content of this newsletter relevant to you?

Absolutely! Meh.

Some of it. Sorry, I had nodded off.

Literally speaking – Answer
“Dnes se necítím ve své kůži” is what a Czech person might say when they're not feeling well.
