

TRAUMA AND EMERGENCIES: INTERVENTIONAL RADIOLOGY PERSPECTIVE

Friday, October 21, 2022, 09:00-17:00 CEST

JOIN US TO LEARN MORE ABOUT TRAUMA TREATMENT!

Interventional radiology plays a crucial role in any trauma team, providing fast and efficient treatment for haemorrhages. In order to further increase the community's awareness of all IR can do in the ER, CIRSE is offering a free full-day webinar worth six CME credits on the IR perspective on trauma and emergencies taking place on Oct. 21 from 09:00-17:00 CEST. Register today to secure your spot in this interactive webinar!

CIRSE 2022 ON DEMAND

Revisit your favourite content from CIRSE 2022 and watch all sessions you could not attend live! All lectures continue to be available on demand to congress attendees via the event platform. All of this year's record-breaking 41 industry symposia are available free of charge to interested parties.

Two new courses

The CIRSE Academy has added two new topics to its offering of educational online courses. D. Filippiadis and M. Tsitskari explore percutaneous neurolysis in cancer patients in their course, while A. Ryan and D. Filippiadis give a detailed overview of the treatment of benign renal masses and perirenal collections. Access to all Academy courses is included in the Digital All-Access Pass.

Places still available for 2023

Are you considering sitting the European Board of Interventional Radiology examination to take your IR career to the next level? Plan ahead and secure your spot for March 23, 2023 (English or German) or October 19, 2023 (English or Spanish)! For tips and tricks on how to prepare for the exam, watch this video featuring some of the most successful candidates to date and check out the preparation material!

Articles you cannot miss

Over the last couple of months, CVIR has published a great number of articles that are absolute must-reads for all IRs. Check out the recently published commentaries put together by Dr. Tiago Bilhim depicting the locoregional challenges for IR practice from around the globe and make sure to read the four articles corresponding to this year's FIRST@CIRSE session. Enjoy!

Webinar: IR in liver tumours

The European Trainee Forum is hosting another instalment of its webinar series featuring basic and semi-advanced content, this time exploring the role of interventional radiology in the treatment of liver tumours on Oct. 27, at 18:00 CEST. Participation is free of charge!

Percutaneous tumour ablation

The European School of Interventional Radiology will host a two-day course on the reliability of percutaneous tumour ablation. Taking place in Innsbruck/AT from Dec. 15-16, this course hosted by Prof R. Bale will give attendees an overview of the currently available devices and techniques to conduct the procedure and follow-up. Early bird fee registration ends on Oct. 20, so make sure to register today!

Are you ready for IO Accreditation?

IASIOS helps facilities evaluate their patient pathway in keeping with the Standards of Quality Assurance and certify that they offer the best possible patient care in IO. See your current standing for the requirements with a self-assessment checklist, join the IASIOS community, get your Enrolled Centre seal and work with the IASIOS team to bring your facility to the next level!

CVIR Endovascular blog

"Speaking of Vascular Interventions" is CVIR Endovascular's blog which regularly lets readers take a deep dive into selected IR topics. It offers a space for communication outside of the confines of academic articles for stimulating conversation about current issues in IR and how the field is progressing in different regions around the globe. Read all blog posts here!
