September 14 – 18
Lisbon | Portugal

2023 IS ALMOST OVER – PLAN YOUR SCIENTIFIC YEAR 2024!

The new year will be upon us before we know it, so it is certainly not too early to plan your professional year 2024, especially when it comes to presenting your work to the scientific community. Take note of these 2024 abstract submission windows!

Take note of these 2024 abstract submission windows!

- ECIO | Nov. 6 – Jan. 18
- ET | Dec. 4 – Feb. 15
- CIRSE | Jan. 16 – March 21

Choose the best platform for your work and gain exposure to the world's biggest IR community!

Webinar on cerebral thrombectomy

This upcoming CIRSE webinar will delve into developments in mechanical thrombectomy, covering the efficacy of the technique, speed of performance, expansion of indications, and quality monitoring programmes. Join us for free on Nov. 30, from 17:00-18:00 CET to ask your questions and be part of the debate!

Fellowship grants available for 2024

CIRSE is excited to announce the relaunch of its fellowship grant programme which allows CIRSE members to apply for a €3,000 grant to fund a one-month stay at a European centre outside their country of residence, where they can train or experience new procedures. Browse the participating centres of excellence and apply today!

ESIR 2024 courses

ESIR has a fantastic lineup of procedural courses awaiting in 2024, kicking off the year with two courses at the Institute of Image-Guided Surgery in Strasbourg. Gain hands-on experience in immersive animal lab trainings and work side by side with international experts in the course on liver, kidney and thyroid ablation from Feb. 1-2, and a course on embolization with coils, plugs, gelfoam, and particles from March 14-15. Due to the intensive hands-on aspect of these courses, spots are limited, so register today!

Check out the ECIO 2024 programme

The preliminary programme for ECIO 2024 is now online for your perusal. Highlights include combination strategies for HCC treatment, immuno-oncology, paediatric IO, ECIO meets sessions featuring ESTRO and ESOT, a basic course on kidney and adrenal ablation, as well as hands-on device trainings on cold and heat-based ablation, radioembolization, and much more. Browse the timetable, submit your abstract, and start planning for ECIO 2024 today!

Add EBIR to your name in 2024

The European Board of Interventional Radiology – EBIR – has become synonymous with IR expertise, giving practitioners the opportunity to certify their knowledge on an international level. Register now for one of the 2024 EBIR examinations in English, German, or Spanish to add the coveted EBIR title to your name and give yourself an edge in future job applications!

Start your research project in 2024

If you have been mulling a research idea, but have been put off by the prospect of having to raise the necessary funding and get over bureaucratic hurdles by yourself, contact CIRSE's CRO Next Research with your idea. The experienced team will be happy to help you with developing a study proposal and taking all necessary steps to put your ideas into practice!

Take your career to the next level in 2024

If you are at the beginning of your IR career, make sure to harness the power of networking and follow the European Trainee Forum on Facebook, X, and LinkedIn to stay up to date on all of its initiatives, including webinars and dedicated sessions at CIRSE congresses. If you would like to represent the ETF in your country, get in touch at etf@cirse.org!

Help IR gain specialty status in your country

The specialty status of interventional radiology varies greatly from country to country. Check out the CIRSE 2023 session on this important topic in which experts from around the globe shared their experiences achieving, applying, or striving for recognition of IR as a specialty status and learn how you can support IR's status in your country!

CVIR special issue: Mastering musculoskeletal interventions

CVIR's November issue features a special section on MSK interventions curated by Prof. Julien Garnon honing in on the latest technical advancements and most significant data from the literature on all current MSK hot topics and providing an overview of what is possible and the results that can be obtained for patients. Special thanks to each of the authors who contributed their time and research, as well as to the guest editor! Learn more about this special issue via the CIRSE Insider or access it directly here!

Latest blog: The first EBIR holder in China

Check out the latest CVIR Endovascular blog post by a member of the journal's reviewer forum, Dr. Yu-Dong Xiao, to learn how he became the first EBIR holder in mainland China. He explains that while EBIR certification doesn't substitute national licensing, it significantly validates his professional knowledge and enhances his career. If you have an idea for a blog post, get in touch at info@cvirendovascular.org.

The CIRSE Newsletter has a new format

In order to keep you updated on all of CIRSE's projects and initiatives year-round, the society newsletter has changed its format and will not be available online via the CIRSE Insider. Links to the in-depth interviews and articles will be brought to you every month via the e-newsletter, CIRSE's social media channels, and of course the CIRSE app!

IDEAS 2023

The Interdisciplinary Endovascular Aortic Symposium taking place at CIRSE 2023 was another great success, uniting endovascular and surgical specialists in a truly multidisciplinary setting to discuss hot-topic issues, current developments, and future possibilities in the field. Review the symposium via CIRSE Insider!
